Workshop Preparation: Search Strategies

Research Question: Which **[E] criteria, assessment tools or algorithms** are used to decide **[O] who is eligible for long-term care, and at what care level**, including for **[P] people leaving intermediate or post-acute care**? And **[O] what evidence supports them**?

	PECO
P	People of any age assessed for LTC, including people leaving intermediate/post-acute care (IMC)
E	Criteria, assessment tools, grading systems or algorithms used to decide LTC eligibility or care level
C	*N/A*
O	**Main:** the domains assessed, the decision rules or cut-offs, and the eligibility or care-level result. **Supporting:** reliability, validity, and later outcomes (LTC entry, decline, death)

Selected Preliminary Papers → MAPPED to PECO

#	Paper	P (who)	E (tool)	O (what it reports)	Search words it tests	Why it's a good seed
1	Tsutsui 2005	Older people, Japan	National certification algorithm	Care level assigned	#1+#2: certif*, care level*	Core case: a national eligibility system
2	Fries 2002	Older and disabled adults applying for public home care, US	MI Choice screen	Eligible or not, and level of care	#1+#2: eligib*, screening system*	Directly builds an eligibility tool
3	Fries 2004	Same as #2	Telephone vs in-person screen	Agreement between the two	#2: screen*, eligib*	Shows a "screen, then full assessment" process
4	Kim 2013	Older LTC insurance users, home + facility, Korea	One part of Korea's certification tool	Validity against care time	#1+#2: LTCI, certif*	**Hard case:** abstract may not say "eligibility"
5	Tsugihashi 2021	Home-care patients, Japan	Certified care levels	Validity against real function	#2: care level*	Tests a system already in use
6	Van Doren 2021	Adults of all ages, Belgium	BelRAI (decides care-budget eligibility)	Scores vary by assessor	#3: BelRAI · #2: care need*	Eligibility beyond older people
7	Hirdes 2008	Home-care clients, Canada	MAPLe priority algorithm	Priority; later nursing-h	#3: MAPLe, interRAI	**Boundary case:**priority, not eligibility

				ome entry		
8	Bolster-Foucault 2023	Hospital-to-home clients, Canada	RUG-III/HC care-level classification	Care time explained	#3+#4: RUG-III, transitional care	Closest to IMC → LTC (old Q2)
9	Turner-Stokes 1999	Rehab patients at discharge, UK	Northwick Park Care Needs Assessment	Weekly care hours needed	#3+#4: Northwick Park, discharge	Post-acute paper that never says “LTC”
10	Takei 2008	Physical, intellectual and mental disability, Japan	Disability support-needs assessment	Type and amount of service	#1+#2: disability service*, support need*	Tests the all-ages scope
